Office Action Summary	Application No. 10/613,920	Applicant(s) SCOZZARI, FRANK	
	Examiner Sherman D. Basinger	Art Unit 3617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 10, 2006 has been entered.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: reference numeral 7 is no longer mentioned in the description. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 113-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lehr et al in view of McConnell.

Lehr discloses for claim 3 a handle for a body board, comprising: a post 22 configured to pass through a body board and connect to an anchor 16; a strap 24 configured to attach to the post; and a handle structure 14 configured to receive the strap.

Lehr does not disclose that the strap has a first end and a second end and that the handle 14 is configured to receive the first end of the strap. Lehr et al also does not disclose a buckle configured to receive the first end of the strap and the second end of the strap such that the strap forms a loop when the first end of the strap and the second end of the strap are attached to the buckle and wherein the handle structure is configured to press a hand against the post when the strap is tightened through the buckle.

Note the strap 30 of McConnell which has a first end and a second end, and note the buckle 31 which receives the first end and the second end of the strap to form a loop and such that the strap is configured to press a hand against the part 9.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to provide a buckle similar to 31 of McConnell to strap 24 of Lehr et al and to provide first and second ends to the strap 24 of Lehr et al similar to the first and second ends of the strap of McConnell so that strap 24 of Lehr et al can be adjusted to press a hand against the post when the strap is tightened through the buckle. When strap 24 of Lehr et al is provided with a first end, the handle 14 will inherently receive it.

Lehr et al also discloses the second post configured to pass through the body board and attach to an anchor.

With Lehr et al modified to have a buckle, the strap will form an elongated loop when the first end of the strap and the second end of the strap are attached to the buckle.

Response to Arguments

5. Applicant's arguments with respect to claims 13-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherman D. Basinger whose telephone number is 571-272-6679. The examiner can normally be reached on Monday through Friday, 5:30 a.m. to 2:00 p.m.
